Shipping Notes.

The schooner Moiwahine will go into commission again to-morrow. She will go to Kohala and Koholalele.

The schooner Ka Moi is expected to-morrow or Thursday with a load of sugar from Hamakua mill for the bark S. G. Wilder. The Hawaiian bark Andrew Welch ar-

rived this morning from San Francisco and anchored outside of the harbor. The engagement of the Eleu in towing the Mio-wers off the reef apparently prevented her coming in

The barkentine Irmgard was expected to sail at 11 o'clock this morning, but it transpired that she may probably be required to take the cargo of bananas and other fruits which was intended to be shipped by the Miowera, thus causing the delay in her departure until this evening.

the whole vast field, encourages us to our work at every point. Finally, we feel that the passing of this great measure, after more than 80 days' debate, does, will, and must constitute the greatest among all steps hitherto provided towards the attainment of a certain and early

Prolonged cheers from the Irish and ministerial benches followed Mr. Gladstone's pereration. Leomard Courtney, unionist, then moved the rejection of the bill. He spoke briefly. John Redmond, leader of the Parnellites, who followed Mr. Courtney, defined his attitude toward the bill. The time occupied by the discussion in committee, he The Sons of St. George initiated said, had been spent properly for several members yesterday evening. the most part. The bill was defected tive in some respects, and disap-pointing in others. The financial arrangement was ungenerous and unjust, and he regretted that the efforts of the nationalists to improve it had not been successful. amendments had tended to weaken rather than strengthen the bill. Nobody in his senses could regard the bill as a final and satisfactory settle-

ment of the great questions at issue. The word "provisional" was stamped on every page.—American paper. SENIOR CAPTAIN OF POLICE.

Is Introduced to His Command and

Requests Their Obedience. Mr. L. A. Andrews, senior captain of the Honolulu police force, was introduced to his subordinates at 9 o'clock this morning. The new senior captain in a few well-chosen words addressed the force in Hawaiian. In his remarks he requested the men to aid him in his new capacity, as he came from the country and might perhaps have a few fail-ings at the start, which he hoped would be rectified as time progressed. In conclusion he stated that he was their senior, and he requested their obedience.

THE WEEKLY BULLETIN-28 COL-umns of Interesting Reading Matter.

Leads the Way!

Report of the Foreman Painter, Southern Pacific Co.

TANCRED, July 21, 1892. S. PALMER, Esq., Engineer of District No. 1, So. Pacific Co.

I find that the oil requires much less pigment than linseed to make a paint of the requisite covering and spreading qualities. 100 lbs. of white lead will take no more than 4 to 4½ gals. of linseed, while in my priming coat, I get even better results with 9 to 10 gallons of Lucol, and in my second coat with 7 to 8 gallons of Lucol to 100 lbs. of lead. This means a very material saving (from one-third to one-half) in the amount of pigment necessary to cover a given surface.

In my roof color I used less than 100 lbs

or pigment necessary to cover a given surface.

In my roof color I used less than 100 lbs, of "car paint" (Princes Metallic ground in oil) where a roof of this size has always required 200 lbs, of ear paint with linseed oil. I mixed my roof color with 18 gallons of Lucol to the 100 lbs, of pigment and got a better body of color than I ever got with less than one-half that number of gallons of linseed. I give you simply the facts but I cannot understand or explain them.

The drying qualities of the new oil are perfect. The priming cont with white lead, dried strong and hard inside of 24 hours. The first coat for sand took the sand freely, firmly and in larger quantity than linseed and dried hard inside of 24 hours. The second coat of body color and trimming dried thoroughly without tack inside of 24 hours. It covered perfectly and dried with a fine smooth surface entirely free from wrinkles and blisters, and bore out remarkably well so as to develop a fine lustre, giving much better looking results than I have ever gotten with two coats of linseed on new wood. The car paint spread on the roof was mixed with raw Lucol and dried perfectly in 24 hours. Notwithstanding that only one-half the usual amount of color was used, the paint covered perfectly and did not run. The second coat of sand filled up solidly, taking up a larger quantity of sand more evenly than I have ever gotten on to linseed.

The Lucol has effected a saving of 215 lbs. of pigment or nearly one-third of the amount usually required for a building of this size.

With respect to the general appearance

amount usually required for a building of this size.

With respect to the general appearance of the finished work, I must confess that I never saw its equal in two coat work with linseed, and if the oil wears as well at Tancred as it has worn with the Master Car Painter, Mr. Fitch, at Sacramento, there can be no question about the SUPERIORITY of Lucol over linseed, even at the same price per gallon, in ECONOMY, GOOD LOOKS and in DURABILITY.

Yours Respectfully,
[Signed] W. H. MELLUS,
Foreman Painter, Southern Pacific Co.
